Re: Olin Chemicals/McIntosh Plant Site  
McIntosh, AL  
Telephone Conversation of August 22, 1991

Dear Ms. Smith:

This letter is to confirm our conversation on August 22, 1991. We discussed the following topics:

- 1) EPA's planned sampling of residential property south of Olin;
- 2) the RCRA Facility Assessment Report from A. T. Kearney; and
- 3) Olin's response to EPA's letter of August 9, 1991, regarding additional work plan comments.

Relative to topic number 1 above, you informed me that EPA plans to sample surface soils from one resident's property south of Olin along river road. The sampling will be conducted August 24, 1991. The analytical parameters will be the TCL and TAL analyte list using CLP procedures. This sampling is to follow up on information provided by the resident about past flooding of her property. The resident also disclosed to you some information about "toxic chemicals" buried inside Olin's fence line. We agreed that allegations such as these should be investigated jointly and that Olin would have the opportunity to discuss with EPA the information provided by this resident. We also agreed that discussions and plans regarding followup on such allegations by either Olin or EPA should be in writing to insure property communication.

Relative to topic number 2 above, you informed me that A. T. Kearney had submitted the draft report of their RCRA Facility Assessment to Joanne Benante.

Relative to topic number 3 above, you approved a change in the deadline for Olin's response to your August 9, 1991 memo from August 26, 1991 to September 3, 1991. We also agreed that any pages of the work plan that require revision will be submitted one week after EPA and Olin agree on any necessary changes.

Please call me (615/336-4308) if you have any questions or if the above does not accurately reflect our conversation.

Sincerely,

OLIN CORPORATION
